Professional Experience

Company #1 UI/UX Developer:

- Started as an entry-level position, have been learning everything about web design in order to be part of UI Team.
- Designing custom features for customers.
- Making improvements in the performance of the sites.
- Research for solution in different problems.
- Organized and prioritized work to complete assignments in a timely, efficient manner.
- Remained committed to learning and growing inside this exciting industry.
- Worked with a strong attention to detail and excellent record-keeping abilities.
- Served as a friendly, hardworking, and punctual employee.

Company #2 React Project:

- Development of a new web application. The work has been mostly focused in frontend work by building custom components for the client with the best user experience for customers. Also had the opportunity to propose and provide ideas for the implementation of many of the components to match with the customer objectives.
- The application frontend was built with React JS and the design was worked with Material UI as base for the styling of the components but also had to customize the Material UI components to meet client expectations.
- Investigated for available options or approaches used to develop some components and also to make sure to implement them with best practices.
- Took the lead of all the UI work and the delivery of each component.
